USB-C sink controller, configured to negotiate a 20V contract at 3A

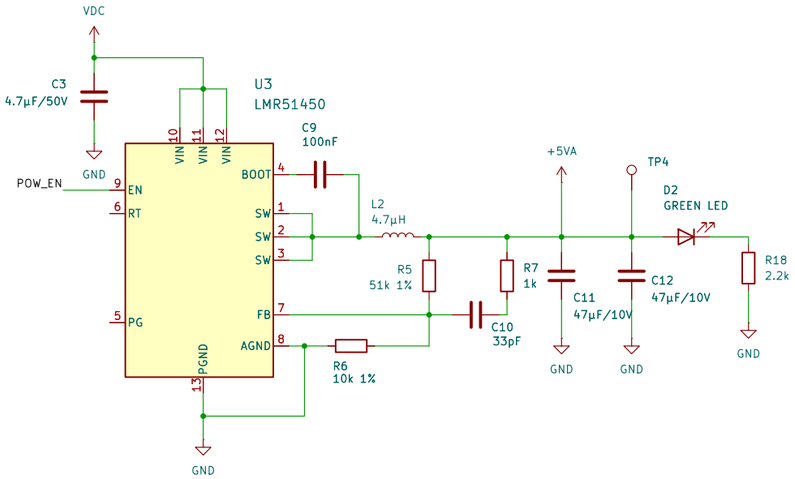

5V @2A step-down converter to power MatrixPortal and ICs

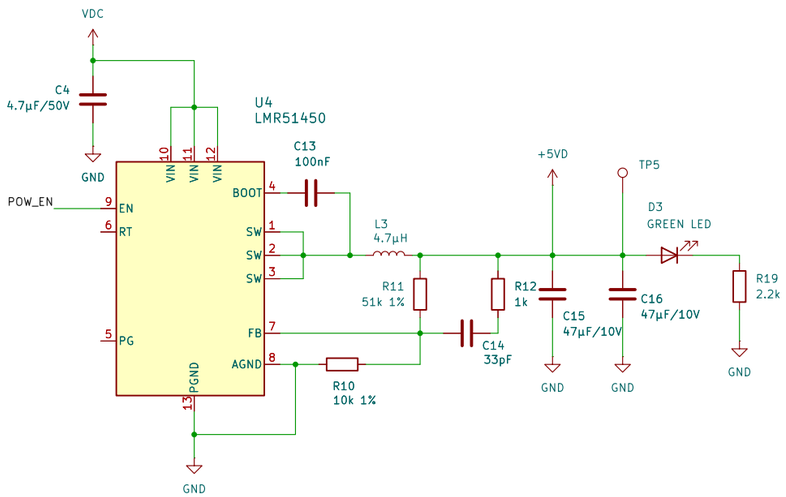

Ideal diode wired for reverse current blocking

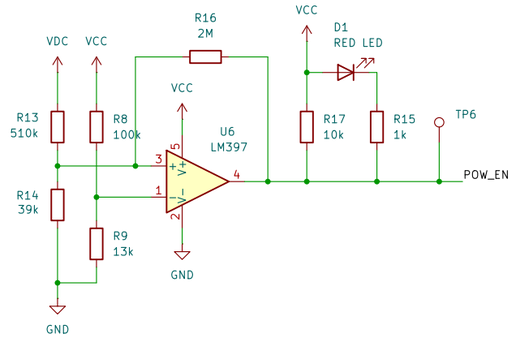

Pair of step-down converters to output 5V @ 5A on each of the power rails

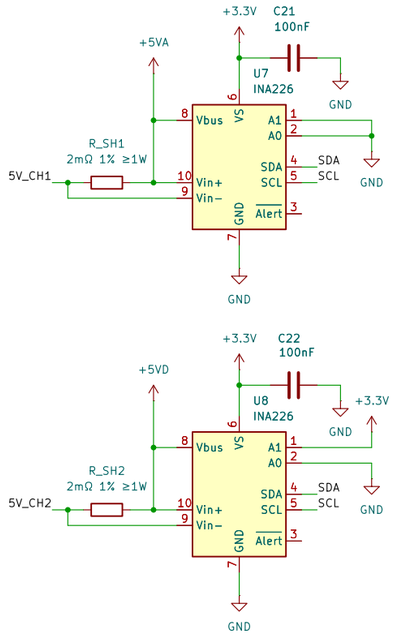

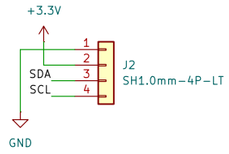

Voltage comparator to determine whether the USB-C contract is good enough to enable the 5V power rails

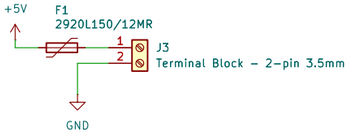

Current sensors connected to the Matrix Portal via I2C

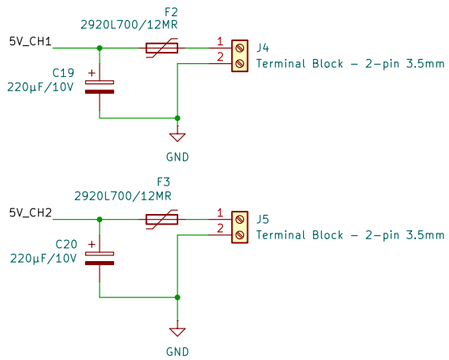

Connects to the StemmaQT port on the MatrixPortal

Connects to the screw terminals on the Matrix Portal for 5V supply

Connects to the dedicated power connector on each matrix panel
